### ABOUT ME

A growing developer and an open source contributor. Always leans to learn and explore new things to solve problems. Like to work in teams at cool startups, building products and seeing them grow.

### EXPERIENCE

#### HackerEarth

Jun 2018 - Sep 2018 ~ 3 months

Frontend Engineer Intern

- Developed FaceCode - a video interview and code evaluation tool, along with real time collaboration and pair programming functionalities.  
~ [goo.gl/CNkEtp](https://goo.gl/CNkEtp)
- Integrated Team Management and invites capping features with recruit product. Also worked on automated real time usage reports generations with visualizations through various charts based on time range, teams and invites capping.

#### Tripshrie

Jan 2018 - Apr 2018 ~ 4 months

Fullstack Development Intern

- Contributed with a team of 4 to build an Airbnb like platform for adventure sports in India. Developed the base for the microservice architecture that was utilized. Worked mainly on auth as a microservice, booking flows, referral invites system, operator onboarding, admin panel with data visualization and access control integration.  
~ [tripshire.com](https://tripshire.com)

#### Coding Blocks

Jun 2017 - Jan 2018 ~ 8 months

Software Development Intern

- Developed HackerBlocks - an online coding and assessment platform. Used for hosting coding contests and classroom program students evaluation and practice.  
~ [hackerblocks.com](https://hackerblocks.com)
- Contributed to the development of online/live programming courses platform.  
~ [online.codingblocks.com](https://online.codingblocks.com)
- Worked on building a static site generator using Gulp for the company's static site, reducing the code changes required for content change by 80%.
